

File Server Resource Manager could not load WMI objects / no FSRM Service

I am experiencing the error below when opening the File Server Resource Manager.

It should be a simple matter of **restarting the related Service**

(as per [https://technet.microsoft.com/en-us/library/ff633450\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/ff633450(v=ws.10).aspx)) however I cannot find the Service, as shown below.

If anybody can offer any further suggestions on how to fix this issue they will be greatly appreciated.
